MISSION:
The Sleep Research Society Foundation is committed to the growth and development of the field of sleep research through education and research funding opportunities.
The Sleep Research Society Foundation (SRSF) provides support for growth and development in the field of sleep and circadian research. The SRSF was established in 2005 by the Sleep Research Society Board of Directors to provide support for investigators to conduct pilot studies that would form the basis of more comprehensive applications to federal agencies, private foundations, and industry partners.

Since its inception, the SRSF has awarded more than $1.9 million in support for research by 55 early career scientific investigators. The SRSF has helped investigators obtain NIH and other government funding through research supported by SRSF awards.
The Sleep Research Society Foundation (SRSF) is pleased to share good news and updates of the Foundation’s activities in 2020, especially given the difficult time everyone faced during the COVID-19 pandemic.

The Foundation announced the eighth solicitation for the SRSF Career Development Award, receiving 29 high quality applications. This SRSF award is an important stepping-stone to future success for many of the recipients. We are extremely grateful to the Scientific Review Committee, chaired by Cathy Alessi, MD, for undertaking the review of these proposals. The review process was aligned to the NIH grant review model, scoring each of the submissions for scientific merit, mentoring, environment, and research plan. The Sleep Research Society Foundation Board of Directors gratefully accepted the Committee’s Report and selected four of these proposals to fund. Three awards are on the broad topic of sleep/circadian research and one on the topic of sleep and electrical neuro-modulation. The three proposals selected under sleep/circadian research represent a broad range of topics and approaches including: a project by Thomas L. Andrillon, PhD, about daytime sleep intrusions in ADHD: behavioral consequences and countermeasures; another by Natália L. S. Machado, PhD, on investigating of a neuro-circuit involved in sleep homeostasis control and stress-induced insomnia; and Grigorious Oikonomou, PhD, to study the serotonergic regulation of sleep in zebrafish. On the topic of sleep and electrical neuro-modulation, Brandon Nokes, MD, will work on the physiologic assessment of the mechanisms underlying negative effort dependence. These projects help to increase the knowledge of sleep and circadian science and change the way we think about the impact of sleep in public health. Funding for these awards would not be possible without committed pledges of support from SRS members and corporate partners through the Funding Our Future Scientists Campaign.

We are thrilled to report that since the inception of the Funding the Future Scientist’s Campaign in 2017, we have secured $267,413 from 93 committed SRS members and $993,500 from 13 committed corporate partners, making it possible to fund 14 SRSF Career Development Award recipients between 2017 and 2020! This international fund-raising initiative provides funding for the SRSF Career Development Award, which helps early-career sleep and circadian investigators with resources to further their research and launch their careers to make significant advances in sleep and circadian science. With nearly $2.4 million promised in pledges from individual and corporate support to be fulfilled over 5 years, SRS members and industry have demonstrated their unprecedented support of the SRSF. The success of the Campaign’s effort would not have been possible without the leadership of Dr. Allan Pack, the dedicated members of the National Steering Committee, and the generous support of our corporate partners and Sleep Research Society members. Further details of the Campaign are provided in the pages of the report. We urge you to continue fulfilling on your pledge to the Campaign so we can continue to safeguard the future of our field through supporting the cutting-edge research of our early-career members.

The 2020 Annual Appeal raised funds for important programs beyond the flagship SRSF Career Development Award. These programs include the SRS Mentor-Mentee Award, the SRS Small Research Grant, and travel awards/scholarships to specialized meetings, including the 2020 SLEEP Meeting Undergraduate Travel Award, and the SRS Foundation’s scholarship to attend the 2020 Young Investigator’s Research Forum. We are happy to share that the 2020 Annual Appeal raised $37,587 from 274 SRS members! The success of this appeal could not have been possible without the efforts of the 2020 Annual Appeal Committee, chaired by Kathy Reid, PhD. The committee’s outreach efforts to our generous SRS members helped 20 early-career investigators to meet with mentors, begin a small research project and attend conferences.

The importance of these career development awards and programs for the advancement of scientific careers cannot be overstated and cannot be achieved without your support. If you have not donated to the SRS Foundation, I personally urge you to support the important work of the SRS and its Foundation, especially during this difficult time in our community. Now, enjoy the success stories told in the 2020 annual report.
The Sleep Research Society Foundation wishes to acknowledge and thank the following individuals for their contributions which directly supported the programs related to the 2020 Annual Appeal.

THANK YOU TO OUR
2020 ANNUAL APPEAL COMMITTEE

The Sleep Research Society Foundation is grateful for the dedication of our Annual Appeal volunteers. These individuals are responsible for leading this effort and their contributions should be applauded.

Kathryn Jean Reid, PhD
Northwestern University

Josiane Broussard, PhD
Colorado State University

Michael A Grandner, PhD, MTR, DBSM, FAASM, FAHA
University of Arizona

Christopher Depner, PhD
University of Colorado Boulder

Philip Cheng, PhD
Henry Ford Health System

Erin C. Hanlon, PhD
University of Chicago
The SRSF was pleased to support these early stage investigators so they can continue to learn and grow as sleep and circadian researchers. Thank you to the many 2020 Annual Appeal donors who made this possible!

2020 SRS Mentor-Mentee Award Recipients
This award supports trainees with limited mentoring options in their chosen field of interest and connects them to mentors at other institutions, providing face-to-face learning of state-of-the-art research techniques, methods, and grant writing.

Janet Cheung, PhD – The University of Sydney, Australia
Cassandra Godzik-Dziobek, PhD, NP – Dartmouth Hitchcock Medical
Misol Kwon, BS, RN – The State University of New York at Buffalo
Po-Yang Tsou MD, MPH – Driscoll Children’s Hospital

2020 SRS Small Research Grant Recipients
This grant is designed to support the research of trainees and early career investigators who otherwise do not have the institutional resources to support new studies and/or do not have a sustained record of external funding. It provides seed funding to support training and research to ultimately allow individuals to successfully apply for or complete career development grants (e.g. K-awards).

Tony Cunningham, PhD – Boston College, Beth Israel Deaconess Medical Center, Harvard Medical School
Daniel S. Joyce, PhD – University of Nevada, Reno
Natalie Michael, PhD – The Quebec Heart and Lung Institute Research Center
Darlynn Rojo-Wissar – Johns Hopkins Bloomberg School of Public Health
BrunoSaconi – University of Pennsylvania

2020 SLEEP Meeting Undergraduate Trainee Travel Award Recipients
This award is offered for undergraduate trainees with an interest in pursuing a career in sleep or circadian rhythms to attend the SLEEP Meeting.

Ilesh Kharadi
Catia Reis - University of Lisbon
Elise Lindsey - University of Arkansas
Abigail Vance - University of Arkansas
Alicja Skwara - Washington State University
Adrien Waeber - The Center of Investigation and Research in Sleep, Lausanne University Hospital

2020 SRSF Young Investigator’s Research Forum Scholarship Recipients
The SRS Foundation partnered with the AASM Foundation to provide scholarships to virtually attend this event which is aimed at providing guidance, tactics, and strategies to better position young investigators for a successful career in sleep and circadian research.

Tony Cunningham, PhD – Boston College, Beth Israel Deaconess Medical Center, Harvard Medical School
Kristin Hoddy, PhD – Pennington Biomedical Research Center
Mairead Moloney, PhD – University of Kentucky
Katrina Speed, PhD – Center of Excellence for Suicide Prevention
Caitlan Tighe, PhD – Veterans Affairs, Pittsburgh Healthcare System
INTERESTED IN SUPPORTING THE NEXT GENERATION OF SLEEP AND CIRCADIAN RESEARCHERS?

LOOKING BACK...

- Would it have been beneficial to attend more scientific conferences as a trainee?
- Did you have a mentor that helped you navigate your path early in your career?
- Was applying for your first grant an overwhelming experience?
- Do you think an additional $50,000 in research funding would have helped jump-start your career?

The SRS Foundation provides funding for travel grants, mentor programs, grant writing workshops, investigator research awards, and other programs that benefit early-career investigators.

Your contribution of $50, $100, $250, $500, or $1,000 will help underwrite these programs to recruit the best and brightest to the sleep and circadian sciences.

Make your donation today at sleepresearchsociety.org/foundation or by scanning the QR code.

All contributions are tax-deductible and will be recognized through SRSF’s comprehensive recognition program! Make your gift today!
In 2017, the Sleep Research Society Foundation embarked on the “Funding our Future Scientists” Campaign, an international fund-raising initiative to raise support to fund early-career investigator awards so more sleep and circadian researchers will be able to launch their careers to make the significant advances needed to understand and treat sleep disorders.

With nearly $2.4 million promised in individual pledges and corporate support to be fulfilled over 5 years, SRS members and industry have demonstrated their unprecedented support of the SRSF.

Progress Update Since 2017

$267,413 from 93 members

$993,500 from 13 corporate partners

14 award recipients

Thank You to the Supporters of the Funding Our Future Scientists Campaign!

Without support from our SRS members and corporate partners, none of this would be possible. Thank you to those who have completed their pledges and those who are committed to fulfilling their pledge commitments in the future.
The Sleep Research Society Foundation thanks the supporters of the Funding Our Future Scientists fundraising initiative. Without support from our members, none of this would be possible. Thank you all for everything you do.

We are confident that these early career stage investigators will increase our knowledge of sleep and circadian science and change the way we think about the impact of sleep in public health.
Since 2008, the Sleep Research Society Foundation has worked tirelessly to widen the reach of our support for early-career investigators. Below are the researchers that have been funded since this award program’s inception.
